## Gates Open Research

---

Dear Angela Okune,

Thank you for your interest in receiving updates about Gates Open Research. The Bill & Melinda Gates Foundation's new open research publishing platform has fully launched. [All articles](#) are freely available and they report new findings in different infectious diseases, describe study protocols and datasets, and document the development of a new software tool.

Gates Open Research uses a model that enables researchers to take control of the publishing process without barriers: freely available articles upon publication and all associated source data, followed by transparent, invited peer review. Full transparency enables reanalysis, replication attempts and data reuse, and therefore increases research integrity and accountability.

Learn more from Trevor Mundel, President of Global Health at the Bill & Melinda Gates Foundation, as he [discusses](#) the envisioned future for Gates Open Research and Lisa Reimer, a foundation grantee and one of the first authors on Gates Open Research, as she [discusses](#) why she and her colleagues from the Liverpool School of Tropical Medicine in the UK chose to publish on the platform.

We hope you enjoy reading and sharing the articles and the associated transparent peer review reports. If you want to stay informed about future articles, or track their peer review process, please [sign up](#) to receive alerts.

**Jennifer Hansen**

Senior Officer, Knowledge & Research Services  
Open Access Policy Lead
