

PECE Design Documents

- The following document outlines:
 - The content of the panel pages that organize PECE (slides 2-13).
 - The *Views* that serve as visualizations of node content (slides 14-17)
- The type of page outlined is listed in the Notes section.
- All content types should eventually be organized with Panels, but for now only those listed are.
- Panels are described as either *Views*, *Quicktabs*, *Fields*, or *Blocks*.
- I gave a high-level overview of the configuration of the *Views* and can describe them in further detail if needed.
- Please contact Lindsay Poirier poiril@rpi.edu with any questions or to request for finer detail.
